

Chemical & Raw Material Pricing

Updated 6/2013

Prices subject to change without notice

A Note About Raw Materials: Raw materials are purchased through the Laguna Clay Co. or directly from the manufacturer. This chart reflects our most popular chemicals. Other items are available AND larger discounts may be obtained.

Please ask after items you may need that are not shown here. We stock (most) chemicals on our store in 1, 5, 10, 25, and 50# increments. Spendy chemicals such as Cobalt are offered in ¼# weights.

Special order amounts in between these may be ordered in advance. Weights are not combined for larger discounts; two bags, 5# each are NOT the same as a 10# bag – just like 2 ½ gallons of milk are not priced the same as a gallon. Due to time & safety considerations, we avoid weighing items at Stone Leaf (most items are weighed & bagged at Laguna.) All prices include a modest fee for bagging the items in weights less than full bags. All FULL BAG prices are 50# unless noted.
